MARINETTE MARINE
BOEING
OCEANEERING
GRIFFON HOVERWORK

Experience. In Defense of Freedom.

Boeing Rotorcraft produces the Apache and CH-47 Chinook rotorcraft for the U.S. Army, and V-22 Osprey systems for the U.S. Navy in state-of-the-art, lean-design manufacturing facilities.

Griffon Hoverwork has delivered more than 150 hovercraft in 40 countries around the world.

Team SSC is the ideal team to design, deliver and support the United States Navy's Ship to Shore Connector. The SSC will provide high-speed, over-the-horizon, heavy-lift capability for the United States Marine Corps Expeditionary Brigade. The SSC's demanding specifications are a perfect fit for Marinette Marine Corporation's experience in aluminum construction and in delivering U.S. Navy and USCG ships, and they play right to Boeing's strengths in advanced rotorcraft technology and systems integration.

Team partner Oceaneering International holds the current contract for the U.S. Navy's SLEP for the LCAC. They have real-world experience in the factors that enhance craft capability and increase operational availability, and in the conditions that contribute to landing craft wear and tear.

Team partner Griffon Hoverwork has been a pioneer in the development of hovercraft technology since the dawn of the industry more than 40 years ago. They've placed more than 150 hovercraft in more than 40 countries worldwide.

The SSC will be built at MMC affiliate ACE Marine, builder of the USCG Response Boat Medium.

Oceaneering's LCAC repair and maintenance experience provides invaluable input into SSC design.

MMC delivers the United States Navy Littoral Combat Ship.

The team's approach to the challenge is direct and to the point: Build a lower-cost, higher-availability, next-generation craft. Their combined strengths and capabilities are unmatched:

- Lean Design and Manufacturing
- Demonstrated Ability to Deliver on Navy Contracts
- Proven Success on Complex Rotorcraft Systems Integration
- Experience in LCAC Maintenance and Repair
- Total Global Life Cycle Support

Team SSC is a powerful combination of companies with impeccable credentials. Their combined expertise in vessel construction, marine engineering, naval architecture, systems integration, LCAC maintenance, and rotorcraft power systems are recognized worldwide. It's a hand-picked team focused on affordability, availability, maintainability and total life cycle support. Please go to www.ship2shoreconnector.com for additional information.

Boeing produces the V-22 Osprey, the AH 64-D Apache Longbow and the CH-47 Chinook rotor wing aircraft. In its Mesa, Arizona plant, Boeing operates one of the world's most sophisticated flight simulator facilities.

The varied defense systems delivered by Team SSC lay the foundation for the quality, reliability, and state-of-the-art systems integration that will be built into the Ship to Shore Connector.
